THE STORY OF 'X'

X, previously Twitter, has undergone massive upheaval in the last several years. Following an acquisition by Tesla CEO Elon Musk in 2022, the text-based social media platform underwent a name change, mass layoffs, and a loss of ad revenues.

Following a dip in users, X isn't as brand-friendly as Twitter once was, but the platform will still be used by 348.6 million people worldwide in 2024

Sale to Musk and rebrand to X

Tesla CEO Elon Musk is the current owner of X and the ideator behind its rebrand from Twitter. Under Musk's leadership, X has struggled with its aim to become an "everything app" as it faces challenges with monetization, brand safety, and US user decline.

Struggles with X

Twitter was already struggling with monetization before its sale to Musk. US ad revenues climbed by an astonishing 42.2% YoY in 2021, but they've dipped every year since then.

THE TIMELINE OF 'X'

January 2022: Musk begins purchasing stock in Twitter.

April 2022: Twitter accepts a \$46.5 billion bid from Musk.

October 2022: Musk's takeover is finalized.

March 2023: Musk values Twitter at \$20 billion, less than half of what he paid for it.

May 2023: Musk hires former NBCUniversal ad head Linda Yaccarino as Twitter's new CEO.

July 2023: Twitter rebrands to X. Yaccarino posted on the platform, "X is centered in audio, video, messaging, payments/banking—creating a global marketplace for ideas, goods, services, and opportunities."

KEY FINDINGS

Rebranding Awareness

Awareness regarding the rebranding of X has been circulated through diverse channels, primarily news articles and social media posts. Additionally, the official announcement from X (formerly Twitter) has served as a key source of information regarding the rebranding. While efforts have been made to raise awareness about the rebranding, the pivotal question remains: has the new essence of the brand been effectively conveyed to the current user base (in order to retain them)?

Perception about X after Rebranding

X's mission stands in stark contrast to that of Twitter. X aspires to become an everything app, spanning from shopping to banking, whereas Twitter primarily served as a platform for expressing opinions within a 140-character limit. Users on this platform, particularly the original Twitter users, typically lack an inclination towards shopping or product browsing. This complete transition from Twitter to X has yet to reach the existing customer base in its entirety because the survey clearly states a neutral opinion about the rebranding.

KEY FINDINGS

Usage of X after Rebranding

The overall impact of the rebranding from Twitter to X on user engagement and interaction frequency appears to be largely neutral. Very small amount of sample has shown increase in their usage of the platform post rebranding.

Likely user recommendations after rebranding.

Based on this data, it's evident that the existing users hold a neutral stance regarding recommending X to their friends or family. Only a small fraction of individuals are inclined to recommend X, while an equally small percentage are unlikely to do so following the rebranding.

The background is a dark navy blue. It is filled with a dense, chaotic pattern of colorful, hand-drawn style lines and shapes. These include various colored loops, swirls, and straight lines in shades of orange, yellow, light blue, purple, pink, and red.
